

## INDELTA EQUIPMENTS

### GARDEN TYPE ROTAVATOR

### INDELTA GARDEN TYPE ROTAVATOR

The professional garden type rotavator with digger series produced in our factory takes its motion from the tail shaft and is a milling part that moves perpendicular to the direction of movement and it consists of blades. Our machine is used to hoe fields and it mixes organic substances in the soil (stalk, green grass and all kinds of plant residues) into the soil by crushing them. It also avoids microorganisms to be destroyed.

Thanks to the rear cover, while our machine is processing the soil, it performs an ideal field process by performing the levelling process.

It is produced with one our four cycles

### TECHNICAL DETAILS:

	WORKING WIDTH	TYPE OF GEARBOX	BLADES	WORKING DEPTH	POWER APROX.	WEIGHT
MODEL	CM.	//	N`	CM.	HP	KG
SMRTG-130	120	SINGLE ROTATION	30	20	35	400
SMRTG-160	150	SINGLE ROTATION	36	20	40	440
SMRTG-180	175	SINGLE ROTATION	42	20	50	480
SMRTG-210	200	SINGLE ROTATION	48	20	55	532
SMRTG-240	230	SINGLE ROTATION	54	20	60	590
SMRTG-130P	120	VARIABLE ROTATION	30	20	35	435
SMRTG-160P	150	VARIABLE ROTATION	36	20	40	475
SMRTG-180P	175	VARIABLE ROTATION	42	20	50	515
SMRTG-210P	200	VARIABLE ROTATION	48	20	55	555
SMRTG-240P	230	VARIABLE ROTATION	54	20	60	600
SMRTG-260P	250	VARIABLE ROTATION	60	20	65	640
SMRTG-280P	270	VARIABLE ROTATION	66	20	75	720
SMRTG-315P	314	VARIABLE ROTATION	78	20	90	870
SMRTG-350P	340	VARIABLE ROTATION	84	20	110	1460
SMRTG-400P	370	VARIABLE ROTATION	96	20	120	1535
